

Now you can

Learn Something New

while you are required to stay at home

Last month the U3A ran a seminar on how to buy and use an iPad. All this information was taught by a local expert and it was recorded. We have now produced a DVD of the entire seminar and we have copies available for all our members.

Now that we are all marooned at home for some time this DVD is a great way to discover how you can find more ways in full enjoyment of this wonderful Apple device that Steve Jobs invented.

If you don't yet own an iPad (or are thinking of upgrading), we have arranged to get you a 10% discount on an iPad. If you just let us know that you want the DVD we will send you a voucher worth £200 that explains how you can get the 10% discount.

To get the DVD all you have to do is send an email to dgsimmons7@gmail.com showing your name and address as:

Your Name

Your Street Address

Your City

Your Post Code

We can then copy and paste it onto a label to send you the DVD. We will also send you a stamped and addressed envelope so that you can send a cheque for £5 to pay for the cost of producing the DVD.

The topics on the DVD are:

1. Which iPad Should I buy?
2. How to set up an iPad
3. Learning all about Settings
4. Find out all the gestures you can use.
5. Setting up your Contacts in one convenient place.
6. Organising your life with Calendars.
7. Finding and using Apps from the App Store.

This will give you a great way to keep your mind active while we are required to stay at Home.
